

A smart investment
for a business that cares about
the climate change!

Kunthu Consultant Pvt. Ltd.

Providing efficient on-grid and hybrid solar solutions with BESS, without any compromise in quality, with a relentless focus on customer delight.

Decades of empowering entities with:

Clean, quiet, renewable and economically sensible solar energy solutions.

Easy to customize, install, configure, and maintain Battery Energy Storage System, BESS – the future of energy market.

We are the only authorized channel partner of Fronius Inverter in Gujarat!

We Are Here For A Purpose.

Kunthu Solar has skilled team and cutting-edge technological resources for site surveys, with expertise in optimal project design in 3D format, installation, execution and lifetime maintenance of the plant, to help businesses to transform into environmentally responsible entities while reducing their energy costs and increasing their bottom line.

Committed To A Responsibility.

As a solar technology leader, we consistently develop and implement innovative methods and practices, forge new paths, and evolve, with customers at the centre of everything we do. Our on-grid, hybrid solar solutions with battery energy storage system help businesses boost productivity and efficiency, increase energy yields, and reduce operating costs, thereby instilling confidence, trust and satisfaction in our customers. We remain committed to this sense of responsibility – consistent profit for our customers.

Our Solar Solutions Perfectly Curated For Industries

- On-grid Solar System
- Hybrid Solar System
- Battery Energy Storage System
- Solar Rooftops/Solar Plant
- Applications In Commercial, Utility-scale, Microgrid And Industrial Energy Storage

Applications

- Engineering
- FMGC
- Packaged Water Plant
- Hospitals
- Schools, Shopping Complex, Community Centres and others

Why We Recommend BESS Solar?

Our Assurance

- Back-up power until power restoration
- Faster response time and efficient frequency regulation
- Voltage stability and renewable energy integration
- Easily upgradable system
- Seamless transfer between grid and BESS
- Smart energy consumption for a wide range of applications
- Well-balanced load between on-peak& off-peak times
- Minimized risk, equalized energy prices irrespective of electricity demand and the season

Now is really a good time to,

Produce your electricity and get
more power back up!
Protect yourself from rising costs!
Enhance the reliability of your
resources!
Maximize ROI on energy assets!
Save the environment for an
upcoming generation!

Kunthu solar has a specialized package that suits your
requirements, applications, industry and business model.

Call us for energy audit and site inspection!
